

Liquid Fish Products Labeling Aid

- If your product contains liquid fish which has been stabilized with phosphoric acid and available phosphate is guaranteed, follow the following instructions:
 1. Add “stabilized with phosphoric acid” or “phosphoric acid as stabilizer” in the derivation statement.
 2. Add heavy metal statement on the label. Refer to the heavy metal label aid.
- If your product contains liquid fish which has been stabilized with phosphoric acid, but available phosphate is NOT guaranteed, no declaration is required in the derivation statement.
- If your product contains liquid fish which has been stabilized with sulfuric acid and total sulfur is guaranteed, follow the following instruction:
 1. add “stabilized with sulfuric acid” or “sulfuric acid as stabilizer” in the derivation statement.
- If your product contains liquid fish which has been stabilized with sulfuric acid, but sulfur is NOT guaranteed, no declaration is required in the derivation statement.
- If your product contains liquid fish which has been stabilized with other acids or has not been stabilized at all, no declaration is required in the derivation statement.
