7			

### Digital Photograph

Digital photos sufficient enough to identify the equine, usually taken of both sides and face of the equine. They can be used on electronic forms.

### Registration Tattoos

Should be recorded and included as part of the description of the equine. The equine must be accompanied by registration papers.

### Microchip

USDA compliant 134.2 kHz (ISO 11784/11785) microchips placed into the nuchal ligament in the middle third of the neck on the left side on the equine.

Non-ISO electronic identification injected to the equine on or before March 11, 2014.
