

Drip Irrigation and Nitrogen Fertigation Management for California Vegetable Growers: Videotape

Project Leader

Timothy K. Hartz,
Dept. Vegetable Crops
UC Davis

Summary

This educational video describes the use of drip irrigation in California vegetable systems. It discusses scheduling techniques, the development of efficient N fertigation regimes and the uses and limitations of fertility and soil monitoring techniques. The video was awarded the best educational tool of 1995 by the American Horticultural Society. A detailed study guide is included. The video is available from FREP.
